## New for 2018

M74GB17

# Bronze Grain Color

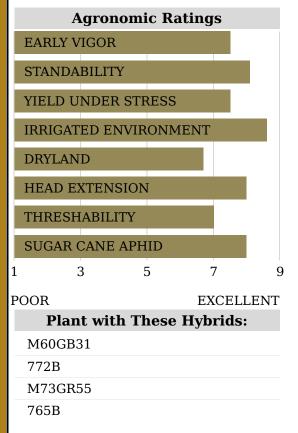

# Dyna-<u>Gro</u>

## Medium - Full • 74 Days Mid-Bloom •

### **Management & Comments**

- Med-Full maturity with Excellent Tolerance to Sugar Cane Aphid
- Bronze-colored, heavy quality grain with Excellent Stalk Health and Standability
- Performs best under irrigation & favorable dryland
- Adaptable to all soil types with very good stress tolerance
- Primary adaption in South Texas, Gulf Coast, Mid-South with ability to move into central Kansas and Carolina's
- Performs well in disease prone areas of the U.S. with excellent leaf disease tolerance
- Tested as GX15484

117 Days RM					
Management Guidelines					
Row Width:		Soils:			
Wide	HR	Silt Loam	HR		
15-20"	HR	Sandy	R		
Drilled	HR	Clay	R		
Populations:		Poorly Drained	HR		
Low	R				
Medium	HR	Yield Environment:			
High	HR	High Yield	HR		
Tillage:		Moderate Yield	HR		
Conventional		Stress Yield	R		
Minimum		Water Management:			
Ridge-Till		Full Irrigation			
No-Till					
		Limited Irrigation	HR		
		Dryland below 21″	R		

#### **Agronomic Traits**

Grain Color	Bronze	Drydown	7	
Endosperm Color	Yellow	Head Exertion	8	
Head Type	Semi-open	Threshability	7	
Plant Height	Tall	Drought Tolerance	7	
Early Vigor	7	Heat Tolerance	8	
Standability	8	Avg. Seeds/Pound (thousands)	13-14	
Late Planting/Cool Weather Response	Normal			
Disease/Insect Tolerance Ratings				
Head Smut	6	Rust	7	
Downy Mildew	9	Fusarium Rot	7	
Anthracnose	6	Green Bug	С, Е	

Resistance

Ratings Key: 9 = Excellent, 5 = Average, 1 = Poor Harcord Recommended, R = Recongrater George N = 8 Not Recommended, n/a=Testing not complete. Sc=Susceptible \*\*Actual ratings based on best current Aphiedion available and may be affected by changing environmental and management conditions\*\*
