

9692

Soft Red Winter

Medium RM

Agronomics

- An exciting variety with explosive yield potential
- Fhb1 type II Fusarium head scab resistance marker
- Widely adapted to most soils in the Midwest and East coast
- Average stripe rust ratings have limited Mid-South adaptability in research data
- Aggressive tillering and great winter hardiness

Seeding Rate/ Million Seeds per Acre

- 1.4 to 1.6
- Good on scab but, head scab fungicides can still lower incidence of infections
- Extremely responsive to foliar fungicides; scout & monitor for stripe rust

Agronomic Ratings

Agronomic Traits
